Content Modules in D2L

1. In D2L, select the course you intend to edit.

2. Select Content on the Navigation bar.

3. Within Table of Contents, select Add a module.
4. Enter **Module Name** and press enter on your keyboard.

5. Hover over module **click** and **drag** up or down to rearrange the content in the table of contents. You can even nest content inside other modules by dragging in to another module.
6. The nested module will appear slightly indented.

![Indented Module (Ex. ISO)](image)

You should now be able to create modules and nest content in to modules within your course on D2L.
