Discussion Board Statistics in D2L

1. In D2L, select the course you intend to edit.

2. Select Discussions on the Navigation bar.

3. Within Discussion, click the downward facing triangle and select View Topic Statistics.
4. View aggregate statistics or student-by-student breakdown. You can sort criteria in ascending or descending order. Any **column header** can be used for sorting. Analyze statistics to know who is posting, replying, etc.

You should now be able to view statistics on a given Discussion Board Topic or Forum, and how to sort the statistics to assist in your grading.
