Using TurnItIn in D2L

1. In D2L, select the course you intend to edit.

2. Select Dropbox on the Navigation bar.

3. Select the Dropbox Folder on which you have enabled TurnItIn.
4. Click on the **Report Score** color to view detailed breakdown. Decide whether to investigate or not. Some professors do not investigate unless the number is above 50%.
5. The originality report shows plagiarism details. To view details on each infraction, select the **source number** that is highlighted in the small red box. An **overview** of each source is shown on the right-hand side.

You should now be able to use and set up TurnItIn on dropbox folders in your D2L class. Originality Report is useful as a general guide, not as an objective measure. Originality Report can be a useful teaching tool in teaching students how to avoid plagiarism and how to properly cite authors in their papers.
