

Lockdown Browser Feature Guide

About Lockdown Browser:

Examity's Lockdown Browser is an optional feature that can be turned on or off for each exam. The feature works through our existing extension, so no additional software needs to be downloaded by your test-takers. Lockdown Browser is able to:

- Close additional tabs that are open in the Chrome browser at the start of the exam
- Close any additional tabs users attempt to open in the Chrome browser during the exam
- Disable copy/paste from the browser (including copy-paste keyboard functions and mouse right-click)
- Disable print from the browser

How to Use Lockdown Browser:

Note: Lockdown Browser must be added to your Examity instance by our team first, so please contact your administrator to confirm if you are not seeing the feature.

Once Lockdown Browser has been added to your account, it will default to "disabled" for your exams. You will need to turn it on for the exams where you'd like to use it.

To enable Lockdown Browser for an existing exam, simply select "Yes" under "Enable Lockdown Browser"

The screenshot displays the Examity exam configuration interface. The top navigation bar includes tabs for Info, Rules, Instructions, Supporting Documents, Scheduling Exceptions, and Exam Results. The 'Info' tab is active. On the right, there are buttons for 'New Scheduling Exception' and 'Delete Exam'. The main form contains fields for Course (Course 101), Exam (Exam), Exam Window (12/01/2019 12:00 AM to 01/01/2021 12:00 AM), Exam Duration (1 Hour, 0 Minute), Link to Exam (https://test.examity.com/onlineexam), and Allow Test-taker to Upload File (No). The Security Level is set to 'Automated Premium'. Under the Features section, 'Auto authentication', 'Auto proctoring', 'Violations with video', and 'Human audit' are all checked. The 'Enable Lockdown Browser' option is highlighted with a red box and a red arrow pointing to it; it is currently set to 'No' with 'Yes' selected. The Exam Password is 'Examity20175'. A 'Save Changes' button is at the bottom.

For assistance, please contact your Examity account manager.

If you are creating an exam, Lockdown Browser will appear on the second page of the exam setup. Click “Yes” under “Enable Lockdown Browser.”

Important:

- Examity is not compatible with third-party testing tools. Only use Lockdown Browser when the exam resides in the LMS.
- You can toggle Lockdown Browser on/off after an exam has been created, but we recommend that you do not adjust after the exam window has opened. This ensures all test-takers have the same experience.

For assistance, please contact your Examity account manager.
