

Additional Information Pertaining to Web-Enhanced Courses

Fact Sheets:

[7 Things You Should Know About...Microlectures](#) (Educause, 2012)

A brief scenario shares a student's experience with microlecture videos, and then key information related to microlectures is provided. If you plan to add just one teaching technology to enhance student learning, consider the microlecture.

[7 Things You Should Know About...Screencasting](#) (Educause, 2006)

This two-page fact sheet offers several examples of screencasting use in courses. For those looking to replicate whiteboard or document camera experiences in an online environment, this is a good starting point.

Article:

[Exploring instructional design issues with web-enhanced courses: What do faculty need in order to present materials on-line and what should they consider when doing so?](#) (Goldberg, 2005)

This paper shares considerations and recommendations for those adding technology components to their face-to-face classes.

Video:

[Make Super Simple Videos for Teaching Online](#)

Dr. Michael Wesch from Kansas State University explains why videos are important in your teaching—and why disliking the making of videos should not keep you from doing it. In addition, he offers specific ways to make this task easier.

Books:

[Online Teaching at Its Best: Merging Instructional Design with Teaching and Learning Research](#) (Nilson & Goodson, 2017)

Although designed for those teaching online courses, this text is also appropriate for instructors wanting to enhance their face-to-face teaching by adding online components. Practical strategies are grounded in research and specific topics are easily accessible.
